Profile

Results-driven Flutter developer with over 2 years total in mobile app development. Proficient in building robust cross-platform applications using Clean Architecture, BLoC/Cubit, and RESTful APIs. Successfully developed and scaled applications in LMS, E-commerce, and real-time messaging domains. Currently advancing skills in native Android (Kotlin) to enhance development.

Professional Experience

- | | |
|---|--------------------------------------|
| Full Time Flutter Developer, Matrix Clouds Maadi 📄 | 08/2025 – Present
Maadi, Cairo |
| <ul style="list-style-type: none">Building and maintaining Flutter applications for both platforms within an agile team. Combining knowledge exchange with hands-on development to drive project success across various business verticals. | |
| Part Time Flutter Developer, Multiurun 📄 | 06/2025 – present
Cairo, Egypt |
| <ul style="list-style-type: none">Building and maintaining Flutter applications from scratch through production, handling bug fixes, feature development, and deployment pipelines. | |
| Full Time Flutter developer, Exabyte LLC 📄 | 07/2024 – 07/2025
El Nozha, Cairo |
| <ul style="list-style-type: none">Developed scalable Flutter apps using Clean Architecture built responsive iOS/Android UIs with RESTful APIs, and contributed to large-scale projects. | |

Projects

- Global Advice - Insurance Application** 📄
- Joined mid-development to implement complex business logic and optimize data processing. Collaborated on feature integration and maintained code quality for production app live on Google Play.
- LearnU - Engineering LMS Platform**
- Developed comprehensive learning management system using custom widgets and MVC architecture. Integrated Firebase authentication with RESTful APIs for optimized performance and scalability.
- Temry - E-commerce Solution**
- Built complete shopping platform with custom UI, secure checkout, and user accounts. Implemented MVC architecture with Firebase backend and shipping APIs integration.
- Bevi - Big Data Processing Platform**
- Engineered large-scale data processing system from scratch using MVVM architecture. Designed for handling complex data ingestion, storage, and analytics workflows.
- Istikbal - Furniture E-commerce**
- Developed modern shopping app with real-time inventory updates via Firebase. Optimized state management and performance for seamless user experience.
- Maher- AI Chat Platform**
- Enhanced real-time communication features by optimizing WebSocket implementation for bidirectional data flow between users and AI server.

Smarthub - Nursery Management System [↗](#)

- Took over project ownership for two applications (teachers & parents) to drive development and resolve critical issues. Focused on feature enhancement, bug fixes, across both platforms.

Al Forsan - Furniture Moving Platform

- Built a dual-application moving service from scratch, featuring separate apps for administrators and customers with complete order management, real-time tracking, and service coordination.

Done - Home Services Platform [↗](#)

- Enhanced existing application by implementing critical fixes and optimizing functionality for service providers and customers.

Clean O'Clock - Car Wash Service [↗](#)

- Took over project ownership to resolve technical issues and implement incremental improvements for better user experience.

I-Med - Academic Application [↗](#)

- Worked with two derivative applications (**2bedoctor** and **وفا وانجز**) from the main I-Med platform, implementing advanced PDF SDK with enhanced capabilities and minor modifications.

SquareToy - Kids Toys E-commerce and Interactive games [↗](#)

- Integrated complete section APIs for the children's toys platform and implemented UI enhancements to improve shopping experience and navigation for parents and gift buyers.

Qannuni - Products & Courses

- Assumed development after UI and auth implementation, completing remaining features including product store, educational materials, and preparing AI chat integration.

The Lamb - Therapy & Assessments

- Built from scratch a comprehensive platform for psychological tests, consultations, and treatment plans with full development lifecycle.

Skills

Mobile Development

Flutter - Android Jetback Compose

Database

Firebase - Supabase - Hive - ObjectBox

Concepts

Solid Principles - OOP

Clean Architecture

State Management

Bloc - Provider - GetX - Riverpod

Programming Languages

Dart - Kotlin - Java

Tools:

Git - GitHub - VS Code - Android Studio - IntelliJ IDEA

Networking

REST APIs - Websocket

Design Patterns

MVC - MVVM

Data Management & Storage

Education

Computer Science, El Shrouk Academy

2018 – 2022

Faculty of Computer Science and Information Technology

Languages

Arabic

English

B2
